IG SYSTEMS

IG Decorative:

Exceptionally heavy duty, decorative and hygienic elastic floor systems for changing rooms, showers and toilet blocks, hospital corridors, schools, cinema's, restaurants, outlets, shops, living rooms, etc. Herculan IG Decorative is a two-component polyurethane or epoxy self leveling floor covering. It is solvent free and has high surface hardness. Herculan IG Protective is hydrolysis and chemical resistant against acids, hydroxides and solvents.

IG Protective:

Exceptionally heavy duty, hygienic elastic floor systems for changing rooms, showers and toilet blocks, offices, heavy machinery flooring, parking garages, workshop, warehouses etc. Herculan IG Protective is a two-component polyurethane self leveling floor covering. It is solvent free and has high surface hardness. Herculan IG Protective is hydrolysis and chemical resistant against acids, hydroxides and solvents.

Equine:

Herculan IG Equine was designed by Dutch technicians to provide a safer, more comfortable and a quieter environment for your investment – your horse. Herculan IG Equine is now being introduced around the world. It is designed to prevent the leg and foot injuries, reduce straw requirements and it is impermeable to urine and other fluids. Its easy to apply on slopes and can be 'coved' up the wall. It can be installed in your horse boxes, stalls, barns, wash-bays, open and closed walking areas, corridors, hospital areas, horse exercisers, lorries and trailers. It is ideal for veterinary areas.

Herculan IG 400

Solvent-free, decorative, broadcast, self-levelling, epoxy system for concrete, cementitious screed and anhydrite surfaces.

Herculan IG 400 is a solvent free, seamless, decorative, self-levelling, polyurethane system. It provides a decorative, impermeable, durable and easy-to-maintain floor system with a glossy appearance. A multi-functional as well as an aesthetical floor covering, which can be applied in various branches of the industrial as well as the domestic and public sector and it can be delivered in a large range of colors and designs.

Herculan IG 400 can be broadcasted with a large variety of broadcasting material. Though it can be applied with a smooth surface, by choosing a different broadcasting material it can also be applied with a rough and non-skid surface.

Due to the usage of solvent-free synthetic resins, the materials used are environment friendly.

The **Herculan IG 400** system creates a non-porous, flat or by choice a (mildly) rough surface, with a well-maintained and aesthetical appearance.

It can be applied on concrete, cementitious screed and anhydrite surfaces.

All **Herculan IG** systems are easy to maintain and can be resurfaced when required.
