

*Art-Ice, the skating surface  
for Fun and Sport,  
always and everywhere!*

## the skating surface

Betech Kunststoffen B.V. has developed a synthetic skating surface. Skates with blades from 1.2 mm width (ice hockey and figure skates) can be used on this skating surface without causing any noticeable damage to the surface. This skating surface, called Art-Ice, does not require any electricity or gas! Art-Ice is more economically efficient than an artificial ice skating rink and meets all safety standards.

Art-Ice is 365/24. This surface can be used in all temperatures and during all seasons, 365 days a year and 24 hours a day. This means year round skating fun without the need to invest in costly energy. The Art-Ice skating surface is available in any shape and size.. You can even choose your own colour!

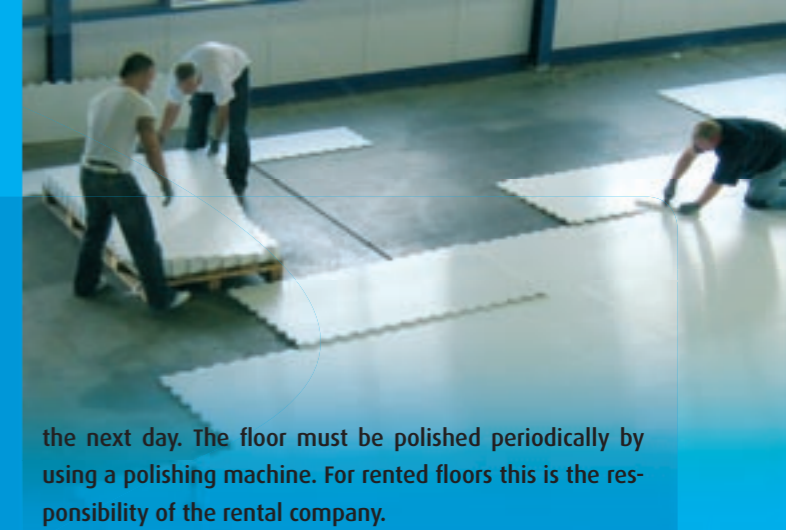

- no limitations on location or time of year
- no electricity or gas consumption
- no a limitations on shape or size,

## Assembly and Maintenance

The Art-Ice skating surface consists of synthetic panels. Each element measures 100 x 200 cms and has a thickness of 20 mm. The elements are stackable and can be easily lifted by 2 people. Art-Ice can be laid on any firm and even surface. The panels are laid directly onto the surface and are seamlessly assembled. The same goes for dismantling.

A precision dovetail system ensures a seamless assembly of the panels. The border elements can be fitted with boarding. When all the elements are assembled, you will have a firm skating surface.

The skating surface requires hardly any maintenance. Very intensive use may cause small burrs and micro-particles could become dislodged from the surface. Brushing at the end of the day is sufficient to prepare the rink, ready for

the next day. The floor must be polished periodically by using a polishing machine. For rented floors this is the responsibility of the rental company.

For further information visit our site: [www.art-ice.nl](http://www.art-ice.nl)

- Easy assembly
- Rapid dismantlement
- Requires Minimal Maintenance

## Art-Ice, for Fun and Sport

Art-Ice is particularly suitable for Fun and Sports activities.

Art-Ice is ideal for recreational purposes and events. For recreational purposes Art-Ice could be used at campings, bungalow parks and amusement parks. For events, activities such as team building, a sports day, survival or a disco party are just a few examples. Art-Ice is also available for corporate events, community fetes or family parties.

In the field of Sports, Art-Ice is used for Ice Hockey and Figure Skating. Art-Ice is particularly suitable for ice hockey and figure skating clubs and a perfect addition to their existing ice surface. A close season is no longer necessary; there is always a skating surface available for use.

### Technical information

- Material:** Art-Ice consists of synthetic panels which form a dry skating surface.
- Dimensions:** The panels are 100 x 200 cms, but other dimensions are possible.
- Weight:** The floor has a weight of 19kgs/m<sup>2</sup>.
- Colour:** The flood is white, but can be supplied in another colour.
- Thickness:** The panels have a thickness of 20 mm.
- Boarding:** The hard boarding is made of synthetic and a steel frame. The inflatable boarding consists of panama-cloth and only the underside and the skating side are made of Ictex.

Art-Ice is fireproof and is certified in accordance with UL-94.

- For Fun: recreation and events
- For Sport: Ice hockey and Figure skating

## References

To give you an impression of the possibilities we have produced an overview with references. We mention here a couple of references.

- NL -Holiday Park De Krim on the island of Texel – De Krim has a permanent skating rink for their guests.
- NL -Grand Hotel Krasnapolsky in Amsterdam – An Art-Ice skating surface, installed in the ballroom created an appealing ambiance at the annual Society Lunch + auction. The guests were pleasantly surprised and many of them enjoyed a spin around the rink.
- NL -Heerenveen Flyers – The Heerenveen skating hockey players have their own skating hall with an Art-Ice ice surface of 600 m<sup>2</sup> in the sporting town of Heerenveen.
- DK -Copenhagen – Denmark – this is a permanent Art-Ice skating surface
- CN -Shanghai – China – this is a permanent Art-Ice skating surface

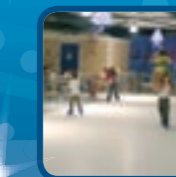

## Agenda

If you are interested in the activities planned for the coming period, you will find a schedule of all the activities worldwide on our site.

## Rent and Sale

Depending on your requirements we can offer a wide range of options for rent or sale. The rental service of Art-Ice skating rinks is provided by our partners. If you have any questions or if you wish to receive a quotation, please contact Arti-Ice. They will refer you to one of our partners, who will be happy to assist you.
